

Put an end to discrimination.

All films deserve to be preserved and restored – not just famous ones.

The era of non-judgmental preservation has arrived. Don't waste time arguing over which films to rescue and which to ignore – preserve everything.

Digital scanning, preservation and restoration are finally within reach of any archive. Scan every film on your shelves. Just think of the treasures you'll unearth from your labyrinth of rusted "mystery cans."

Viva Restoration Software from AlgoSoft
Kinetta Archival Scanners from Kinetta
